

## 22-23 Accreditation Status

All schools in Virginia are given accreditation ratings based on 6 indicators (9 indicators for high schools). Schools that achieve level one (meets standard) or level two status (near standard) for all indicators are rated “Accredited.” Schools with one or more level three (below standard) indicators are rated “Accredited with Conditions.”

When calculating school accreditation for English and Math, the VDOE considers the performance of eight “achievement gap” reporting groups. Each of these reporting groups is rated at Level One (meets the standard), Level Two (near the standard) or Level Three (below the standard). Collectively, the reporting groups are given an overall rating based on the following formula:

- **Level One**: No more than one reporting group in “Level Two” and no reporting groups in “Level Three”
- **Level Two**: No more than one reporting group in “Level Three”
- **Level Three**: Two or more reporting groups in “Level Three”

Schools that have met the benchmark for all indicators for three consecutive years are granted a three year accreditation waiver by the DOE and will maintain their status as “accredited” for those three years even if one or more of their indicators is at level three. The chart below identifies the achievement levels for each indicator at all of our schools and their accreditation status. “Waiver” indicates a school with one or more level three indicators that is rated “accredited” due to their three-year waiver.

**Green Box=Level One; Yellow Box= Level Two, Red Box=Level Three**
